Employment

Codemanufaktur s.r.o......
Software Developer

Czech Republic
2023 – today

Technologies used: Python, Django, Java, Git, Kubernetes, Docker, Jenkins, Terraform, Helm Charts, Trino, ToxiProxy, Gatling, NGINX, Grafana, GraphQL, PostgreSQL, InfluxDB, Protocol Buffers, Zuul, MQTT, Jira.

Uppsala University – Department of Earth Science (Campus Gotland).....
Graduate Researcher and Teaching Assistant

Sweden
2015 – 2016

- Completed one research project on the Actuator Disc concept.
- Collected and analyzed data for the competitive graduate programs in Sweden using statistical techniques and presented the results to the Academic Board of Education in the Department.
- Administration responsibilities during the registration period for the graduate program Wind Power Project Management 2015 – 2016.
- Prepared introductory notes about Mathematics and Physics (Graduate program Wind Power Project Management 2015 – 2016) for a diverse and multicultural group of graduate students.
- Held weekly lectures about Mathematics and Physics during the two first months of the same graduate program.
- Assisted in weekly computer laboratories during the third month of the program, aiming to introduce the students to the state-of-art software, Windsim.
- Prepared and graded numerous assignments in three graduate courses during the first three months of the graduate program.

Ethniki Asfalistiki (Private Insurance Sector).....
Certified Insurance Underwriter – Class A

Greece
2012 – 2013

- Created contact with prospective high-profile clients.

Fagorama.....
General Manager of Marketing and Sales in South Athens

Greece
2008 – 2010

- Created contact with prospective clients in the region of South Athens.
- Managed the creation of the advertisement catalog.
- Supervised the delivery procedure.

Publications

“The Actuator Disc Concept in Phoenixes”

N. Simisiroglou, M. Karatsioris, K. Nilsson, S. P. Breton, S. Ivanell

Energy Procedia, Elsevier, Volume 94, 269 – 277, 2016,

<http://www.sciencedirect.com/science/article/pii/S1876610216308219>

Education

<u>Green Fox Academy</u>	Czech Republic 2022 – 2023
Completed successfully the “Online Super Intensive Course” with a Specialization in Data Engineering.	
During the period of the course, the student was exposed to two different programming languages – Java and Python, as well as numerous useful Data Engineering tools like Airflow, Docker, Kafka, Google Cloud Platform, dbt, and Airbyte. In the last phase of the course, the students worked on a real-life project given by the company Hiflylabs.	
<u>Continuing Education</u>	Online 2012 – today
Independent study in subjects of personal interest such as Neural Networks and Large Language Models, Quantum Computing, Data Structures & Algorithms, Finance, Cryptanalysis & Ethical Hacking from books and online courses	
<u>Uppsala University</u>	Sweden 2014 – 2015
<i>Master of Science</i> in Wind Power Project Management GPA: 4.0/5.0 Thesis: <i>Actuator Disc. Theory and Application</i>	
<u>University of Crete</u>	Greece 2002 – 2008
<i>Bachelor of Science</i> in Physics, GPA: 7.41/10.00	

Scholarships & Awards

Foundation in Research and Technology MSc Full Scholarship	2008 – 2010
--	-------------

Technical Skills

Programming	Python (Flask, Django), Java, JavaScript (ReactJS), Tailwind CSS, SQL (MySQL, MSSQL, BigQuery, PostgreSQL), NoSQL (MongoDB), InfluxDD, Git, Docker, Kubernetes, Terraform, dbt, Kafka, Airflow, Airbyte, Jenkins, Google Cloud Platform
OS & Software	Linux, Windows, MacOS

Scientific Seminars

<i>The Theory of Relativity and Einstein’s Dream</i>	2006
Department of Physics, University of Crete	

The Physics Department of the University of Crete held a series of successful seminars on popular science under the title “Topics in Modern Physics” aimed at high school students, teachers, and undergraduate students before the National University Entrance Examinations period. In this talk, the audience was exposed to the idea of Unification – one of Einstein’s unfulfilled dreams – by presenting fundamental topics in Physics such as Special Relativity, Quantum Physics, Standard Model Physics, and Cosmology ending with important, at the time, fundamental research questions. The purpose of the talks was to present in a simplified manner the beauty and elegance of the modern topics in Physics that were introduced throughout the 20th century. Every year selected undergraduate students presented talks based on their performance in their studies. One more talk was presented the same year about experimental physics on the topic of Lasers.

Scientific Summer Schools Attended

- “Theoretical High Energy Physics and Cosmology”.....
Paphos, Cyprus 2008
- “Italo-Hellenic School of Physics 2006. The Physics of LHC: Theoretical tools and Experimental challenges.”.....
University of Lecce, Italy 2006

Military Service

Presidential Guard

2011 - 2012

- In charge of a squad of 16 Presidential Guards in the second part of the service.
- Head Instructor of the Presidential Selection Academy during the last month.
- Discharged with High Honors.
